

Physics - Equations

What is the equation to calculate weight with mass and gravitational field strength?

$$\begin{array}{l} \text{(W)} \\ \text{weight} \\ \text{(N)} \end{array} = \begin{array}{l} \text{(mg)} \\ \text{mass} \\ \text{(kg)} \end{array} \begin{array}{l} \text{gravitational} \\ \text{field strength} \\ \text{(N/kg)} \end{array}$$
